PROFESSIONAL SUMMARY

Detail-oriented Software Engineer with a strong foundation in computer science, specializing in data structures, algorithms, and systems design. Proficient in Java, Python, JavaScript, and C++, with proven ability to adapt quickly to new technologies and deliver high-quality solutions. Skilled in cross-functional collaboration, gathering user requirements, and integrating feedback to meet stakeholder needs effectively.

WORK EXPERIENCE

Front-End Developer YourBeat Inc.	July 2024 - Present
- Designed and launched modular UI components using JavaScript, NodeJS, and ReactJS, enhancing user engagement by 25% and accelerating application performance. - Refined API interactions and streamlined state management, cutting data processing times by 40% and improving platform efficiency. - Troubleshoot and optimized cross-platform performance issues, reducing crash rates by 30% across iOS and Android ecosystems. - Authored reusable code libraries and development guidelines, boosting team productivity and reducing onboarding challenges.	
Software Developer Auto Bim Route	January 2024 - May 2024
- Delivered an AI-driven Outlook add-in, incorporating automated meeting summaries and instant access capabilities, saving users 40% of manual effort. - Transitioned legacy user interfaces to modern WPF frameworks, leveraging OpenGL and OpenTK for enhanced visuals and smoother user interactions. - Built CI/CD pipelines with GitHub Actions, accelerating code reviews by 70% and reducing deployment flaws. - Spearheaded the modernization of 15+ outdated modules, improving scalability and ease of maintenance for long-term use.	
Server-Side Assistant Covetus Technologies Pvt. Ltd.	December 2021 - July 2022
- Engineered a real-time inventory data retrieval tool for IGM Corps USA, achieving 70% accuracy and delivering two weeks ahead of schedule. - Streamlined API integrations and database design, improving operational efficiency by 30% and cutting processing times by 40%. - Conducted 20+ detailed code evaluations, achieving a 90% defect-free codebase and accelerating quality assurance timelines. - Collaborated with a team of eight developers using Agile methodologies, ensuring timely and accurate project delivery aligned with client requirements.	
Software Developer Pharmadocx Consultants	March 2020 - August 2021
- Revamped DES decryption algorithms using OpenMP, reducing execution times by 45% and supporting advanced cryptographic analysis. - Developed brute force and dictionary-based techniques, bolstering password recovery processes and security testing accuracy. - Integrated CMake to automate builds, cutting deployment times by almost half of the original and simplifying future maintenance tasks. - Performed rigorous encryption vulnerability analyses, delivering actionable insights to enhance security frameworks.	

SKILLS

Technical Skills: Version Controls, Database Management, Web Development, Backend Development, Cloud Platform Management, DevOps, Testing and Debugging, API Development, Prompt Engineering, API Development, Ontology Development, Full Stack Development, Scripting, ORMs, Blockchain, Smart Contract Development, Design Patterns, Microservices Architecture, Geospatial Development.

Soft Skills: Problem Solving with Algorithmic Thinking, Teamwork and Collaboration, Effective Communication, Critical Thinking, Analytical Skills, Adaptability and Continuous Thinking, Attention to Details, Project Management, Time Management, Creativity, Work Under Pressure, Deadline Management.

Methodologies: Agile (SCRUM, Lean, Kanban), Object-Oriented Design, Continuous Integration, TDD.

Languages: Java, JavaScript, Python, C++, C#, HTML, CSS, SQL, NoSQL, PHP, XML, Prolog, RDF, OWL, Linux.

Frameworks/Libraries: NodeJS, ExpressJS, Spring Boot, AngularJS, ReactJS, JavaFX, TestFX, .NET, WPF, Boost, GDAL.

Tools: Docker, Azure, Taiga.io, Jupyter, Git, GitHub, SVN, JIRA, Postman, Heroku, AstahUML, Maven, CI/CD (GitHub Actions).

LICENSE AND CERTIFICATIONS

Python for Data Science and Machine Learning Bootcamp	December 2024
--	----------------------

EDUCATION

Master of Science in Software Engineering Arizona State University	May 2024
Bachelor of Technology in Computer Science Vellore Institute of Technology	June 2022

ACADEMIC PROJECTS

Visualization of Software Metrics https://github.com/pranawwww/SER516-Team-Louisville	May 2024
- Built a JavaFX-based application to depict software metrics like Burndown, Task Churn, and Defect Density. - Integrated dynamic graph visualizations with Taiga API to facilitate real-time metric tracking. - Automated build and deployment pipelines using Maven, ensuring efficient project management.	
HappyFace https://github.com/akshatbakliwal08/HappyFace	June 2022
- Designed a cross-platform React Native app to enable seamless fee-free fundraising on the Celo blockchain. - Implemented Solidity-based smart contracts, enhancing transactional security and automating fund distribution. - Enhanced state management using Web3 libraries to deliver a smooth and intuitive fundraising experience.	
Task Manager API https://github.com/akshatbakliwal08/Task-Manager-API	September 2020
- Developed a versatile REST API using NodeJS, ExpressJS, and MongoDB, delivering high reliability in production environments. - Secured user authentication through JWT and implemented comprehensive CRUD operations for efficient data handling. - Optimized database operations with Mongoose, ensuring effective query performance and streamlined workflows.
