PROFESSIONAL SUMMARY

Detail-oriented Software Engineer with a strong foundation in computer science, specializing in data structures, algorithms, and systems design. Proficient in Java, Python, JavaScript, and C++, with proven ability to adapt quickly to new technologies and deliver high-quality solutions. Skilled in cross-functional collaboration, gathering user requirements, and integrating feedback to meet stakeholder needs effectively.

WORK EXPERIENCE

Front-End Developer | YourBeat Inc.

July 2024 - Present

- Collaborated with cross-functional teams in Agile meetings to align project tasks, resolve technical issues, and ensure compliance with design and functionality requirements, enhancing team coordination and software delivery.
- Developed and integrated new software components, implemented UI updates, conducted debugging sessions, and optimized code across platforms using JavaScript, NodeJS, and ReactJS, resulting in improved application performance and user experience.
- Prepared comprehensive progress reports, documented code reviews, and created technical documentation to support task management and bug resolution, ensuring effective communication and transparency among developers and stakeholders.

Software Development Intern | Auto Bim Route

Jan 2024 – May 2024

- Developed and shipped the ABR AI Bot for Outlook, an add-in that streamlined meeting management, integrating automated summary generation and instant meeting access using Node.js and WPF.
- Led the UI transition from Windows Forms to Windows Presentation Foundation (WPF), incorporating OpenGL and OpenTK libraries to improve user experience and performance.
- Established CI/CD pipelines with GitHub Actions to optimize development processes by 70%, ensuring high-quality pull requests and minimal defects.
- Collaborated with cross-functional teams, gathering user requirements and incorporating feedback to enhance system performance.

Server-Side Assistant | Covetus Technologies Pvt. Ltd.

February 2021 - March 2021

- Led the development of a real-time inventory data retrieval application for IGM Corps USA using NodeJS and ExpressJS, achieving 99% accuracy and timely project completion.
- Collaborated with the back-end team using Agile methodologies, enhancing API integrations and scalable database design, contributing to overall operational efficiency.
- Engaged in code reviews and design discussions to ensure high-quality software development aligned with project specifications.

SKILLS

Technical Skills: Version Controls, Database Management, Web Development, Backend Development, Cloud Platform Management, DevOps, Testing and Debugging, API Development, Prompt Engineering, API Development, Ontology Development, Full Stack Development, Scripting, ORMs, Blockchain, Smart Contract Development, Design Patterns, Microservices Architecture, Geospatial Development.

Soft Skills: Problem Solving with Algorithmic Thinking, Teamwork and Collaboration, Effective Communication, Critical Thinking, Analytical Skills, Adaptability and Continuous Thinking, Attention to Details, Project Management, Time Management, Creativity, Work Under Pressure, Deadline Management.

Methodologies: Agile (SCRUM, Lean, Kanban), Object-Oriented Design, Continuous Integration, TDD.

Languages: Java, JavaScript, Python, C++, C#, HTML, CSS, SQL, NoSQL, PHP, XML, Prolog, RDF, OWL, Linux.

Frameworks/Libraries: NodeJS, ExpressJS, Spring Boot, AngularJS, ReactJS, JavaFX, TestFX, .NET, WPF, Boost, GDAL.

Tools: Docker, Azure, Taiga.io, Jupyter, Git, GitHub, SVN, JIRA, Postman, Heroku, AstahUML, Maven, CI/CD (GitHub Actions).

LICENSE AND CERTIFICATIONS

Python for Data Science and Machine Learning Bootcamp

Dec,2024

EDUCATION

Master of Science in Software Engineering

May 2024

Arizona State University

Bachelor of Technology in Computer Science

June 2022

Vellore Institute of Technology

ACADEMIC PROJECTS

Visualization of Software Metrics | <https://github.com/pranawwww/SER516-Team-Louisville>

May 2024

- Developed a JavaFX application to visualize key project metrics such as Burndown, Task Churn, and Defect Density through dynamic graphs integrated with the Taiga API.
- Used Maven for project management and automation, enhancing build efficiency and ensuring robust deployment.

HappyFace | <https://github.com/akshatbakliwal08/HappyFace>

Jun 2022

- Engineered a cross-platform React Native application that facilitates fee-free, borderless fundraising on the Celo blockchain, enabling seamless community-driven contributions.
- Developed and integrated Solidity-based smart contracts to securely manage project creation, track contributions, and automate payouts, ensuring transparency and trust.
- Optimized state management and transaction handling, leveraging Web3 libraries to provide a secure, scalable, and decentralized crowdfunding experience.

Task Manager | <https://github.com/akshatbakliwal08/Task-Manager-API>

September 2020

- Engineered a robust REST API with MongoDB's Mongoose, NodeJS, and ExpressJS, incorporating JWT for authentication and covering critical CRUD operations, with full test coverage and minimal defects.
- Collaborated with peers to integrate feedback and optimize API performance.
